Kuwait National Museum Treasury – model of internal wall cladding system developed by 3form for Varia Ecoresin, design Studio A London

3form® creates solutions with innovative materials. Meet the design intent, performance criteria and budget requirements working with 3form as your partner.

CONCEPT DEVELOPMENT COLLABORATION

- Material, geometry and system performance analyses to assist with concept development
- Design reviews to define project details to meet the design brief
- Preliminary cost analyses for early cost definition

ENGINEERING AND PROJECT MANAGEMENT

- Integrate material technologies and building science expertise
- Demonstrate robustness of concepts with prototyping, design validation and performance testing
- Achieve innovative solutions with extensive industry knowledge base

ADVANCE MANUFACTURING AND DELIVERY

- Multi functional operations and supply chain management provide a wide range of skills to provide effective project coordination and delivery
- Minimize construction waste with computerised fabrication
- Projects are delivered as pre-assembled, turn-key solutions leading to sustainable, cost-effective construction

3FORM ADVANCED TECHNOLOGY COMPETENCIES:

- Material Engineering
- Hardware Engineering
- Architecture
- Structural Analysis
- Industrial Design
- Installation Support
- CAD Technologies
- 3D Modeling
- Specification Writing
- Lighting
- Project Management
- Logistics
- Testing (mechanical, structural, aging, weathering, and fire)
- LEED and Sustainable Design
