

# 3form™ Facet Technical Data Sheet

Innovative 3form Facet is a completely modular system for window screens and space dividing applications with endless possibilities. 3form Facet lets you play with light and shadow with 3D elements that can individually rotate 360 degrees to create unique, interactive patterns. Facet is made from high quality sustainable materials that can be fully recycled.

From screens to a large scale eye catching center piece, Facet brings a new dimension to interior space design.

## Product description

Innovative 3form Facet is a simple and completely modular system for window screens and space dividing applications with endless possibilities. Made with a light weight, ceiling counted frame, attachment elements and 3D shapes that click easily onto the frame. With only five components it is very easy to install.

The frame is made of aluminum tubes connected with glass fiber filled nylon connectors, assembled into hexagon shaped units which can be scaled horizontally & vertically to increase width and height making the product very flexible. Attachment elements are high quality brushed stainless steel.

The Injection molded faceted shapes, made from PC/ ABS, are easy to attach to the frame with a simple click. Each Facet can then be rotated 360degrees individually or in sets to create different patterns and transparency.

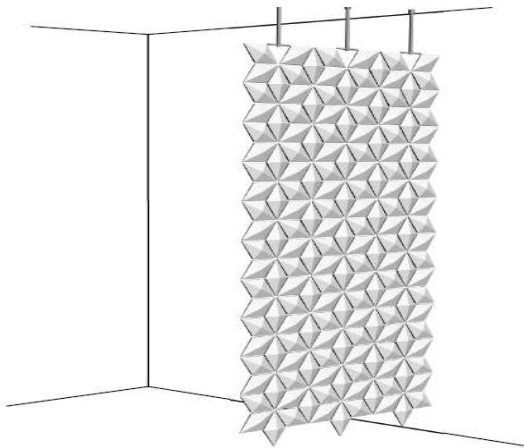

Facet is Designed by Blooming, manufactured in the Netherlands

### FEATURES AND BENEFITS

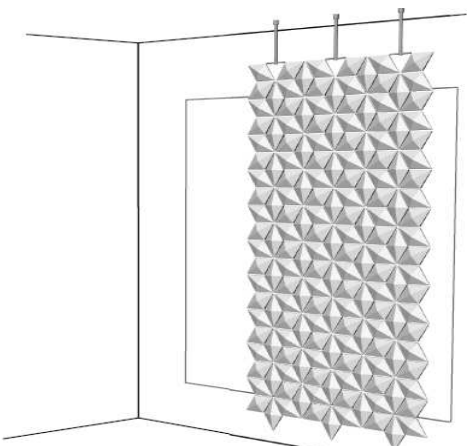

- Completely modular system with endless possibilities
- With only 5 components it is a brilliant and simple product which is easy to install
- Light weight
- Infinite and interactive
- Sustainable
- UV resistant and antistatic

### APPLICATIONS

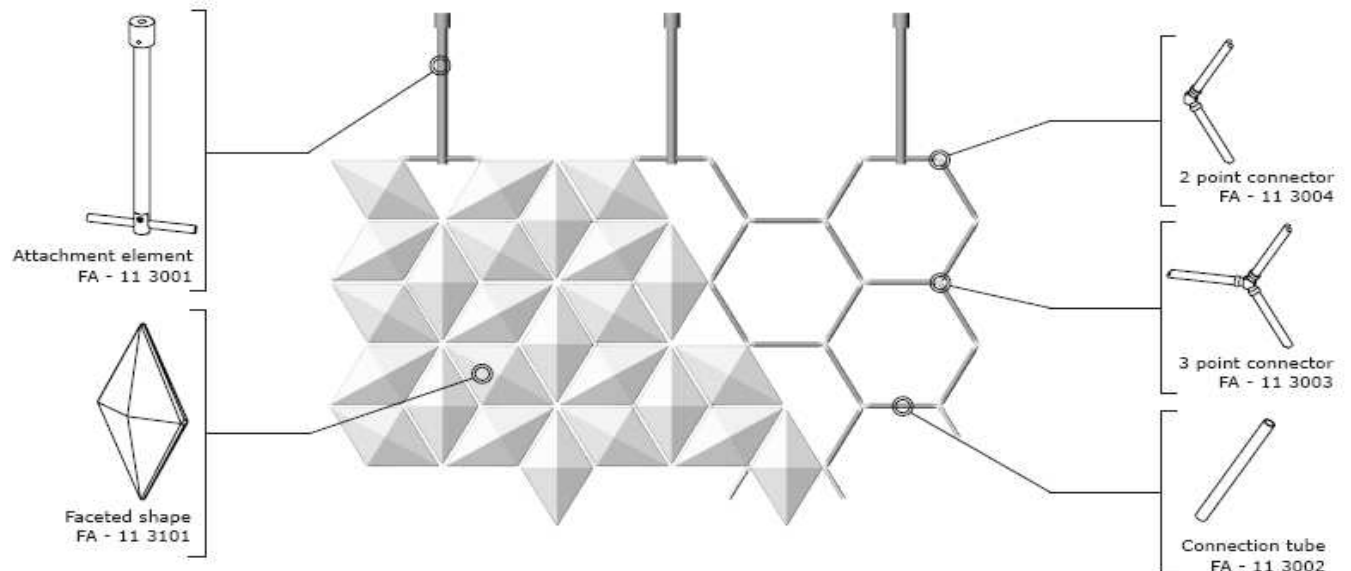

- Partitions

- Screens

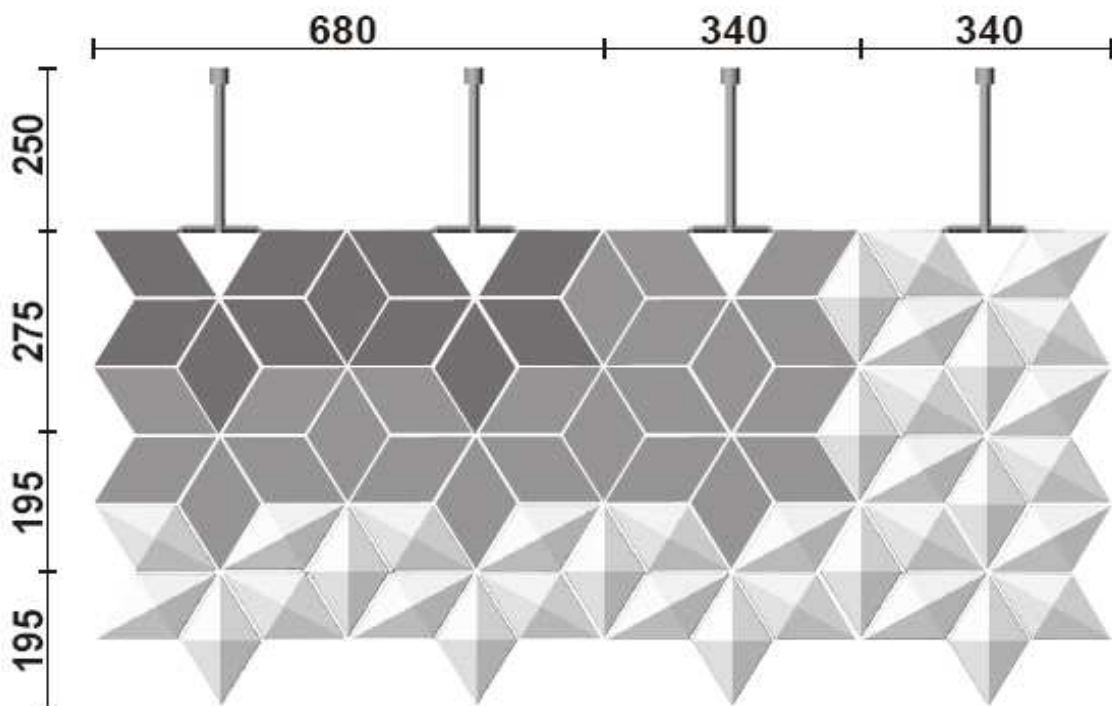

## COMPONENTS

## DIMENSIONS

The frame is assembled into hexagon shaped units which can be scaled horizontally & vertically to increase width and height making the product completely modular.

The height can be increased in 195mm increments up to 2865mm. The width can be enlarged in 340mm increments, where each steps means an additional attachment point.
